Secure Your Network!

All-In-One Intelligent Security

The Challenge

As any computer user or IT expert knows, among today's business Challenges, none is more critical than keeping your network capability alive and well:

- VIRUSES can shut you down. In 2007, 47% of ALL businesses got hit with a virus and over 90% of them were running some form of anti-virus program.
- SPAM can clog the arteries of your business network. In 2007, almost 70% of ALL email was SPAM.
- HACKERS can invade your network and steal your assets.

When your network and data are at risk…your business is at risk!

The Need

Today's businesses demand security protection that provides answers to four basic needs:

- Freedom from business interruption
- Increased productivity
- Decreased company liability
- Seamless and simple integration into legacy networks and systems

The Solution

The Wiresoft Sentry Security Suite*

The Benefits

Complete Network Security Protection

- All-In-One platform protects an entire network including remote users
- Constant monitoring and updating via "ANA"
- No lost messages and total control of "spam"
- Anti-Virus protection at the gateway
- Upgradeable and expandable to new products
- GLBA and HIPPA compliant

Increased Productivity

- No down time means more effective work
- Spamwall means an increase of effective effort – at least 4%
- Gateway spam control means more network capacity
- Content Filtering controls web surfing and reduces lost time
- Restricted web surfing prevents possible law suits
- Unlimited remote access (VPN) promotes efficiency
- Managed service enables remote network management

Business Continuity

- UTM (Unified Threat Management) Firewall yet to be breached
- Gateway Anti-Virus protection yet to be compromised
- Freedom from business interruption
- Protection from loss of data and network intrusion

*The Sentry Security Suite provides complete, multifunctional, and expandable enterprise level network protection for the small-to-medium-sized business in a single platform
